

Kronobit (KNB) Whitepaper

The Future Starts Today!

INTRODUCTION

The new information and communication technologies have significantly strengthened the bond between human beings. Within this context, cryptocurrencies represent the way the world seeks to expand its economic and financial exchanges, beyond the hegemonic structure of the traditional financial system. Kronobit represents the currency that is going to revolutionize the educational and sports aid systems, as well as humanitarian aid, regardless of borders, cultures, creeds or races. The only objective is to serve others in the most difficult and delicate moments.

This cryptoactive is similar to what happened in the 90s with the arrival of the internet, cell phones and smart systems, which opened up many options to reach all corners of the planet.

TECHNOLOGICAL BASE

Its technology is based on the Binance Smart Chain (BSC) blockchains, which allow the transfer of value and information, making it possible to dispense with third parties. This technology constitutes the fingerprint of the digital process and is considered the source of validity of digital currencies; since they provide security to its creation, support and exchange, promoting

that the same currency can be used or exchanged in financial processes, which contains all the tools for the fast, safe and above all decentralized process.

A TRANSPARENT POLICY

Kronobit is a financial exchange tool at a macro, meso and micro economic level that allows the mobility of resources at any level and the digital transformation of them into their equivalent in different types of currencies or cryptocurrencies, thus facilitating commercial transactions and financial support for educational aid projects, ecology, sports support for children and youth, etc.

WHAT IS KRONOBIT?

It is the first 100% community, educational, ecological and humanitarian digital cryptoasset, issued by a group of investors concerned about others, as well as nature.

In addition, it has real support in wealth and goods contributed through: Sales marketing throughout Latin America and the world, using digital platforms, staking systems (POS), farming and the security of the blockchain.

In addition to the latter, a small ecosystem will be built where users who own the token will be rewarded in order to encourage its use to carry out future operations. For Kronobit, the user who owns KNB has an added value, it represents the fact that the success of the project depends on them and, above all, on giving importance to their participation through their voice and their vote in the decisions and implementations that in the future are made. All of this is aimed at adopting an ecosystem that benefits them and is self-sustaining over time, where Kronobit is the utility token between the different platforms.

From anywhere in the world, users can find out all the news and news related to the Kronobit token through:

- ❖ **Our website:** <https://www.kronobit.org>,
- ❖ **Twitter:** <https://twitter.com/Kronobit1>
- ❖ **Medium:** <https://kronobit.medium.com/>
- ❖ **Lbry:** <https://lbry.tv/@Kronobit:0>
- ❖ **Reddit:** <https://www.reddit.com/user/Kronobit>

Kronobit is listed in the wallets: TrustWallet, Metamask and the compatible wallets of the Binance Smart Chain and Binance Dex. The adoption of these wallets is intended to function as reception systems and mass payment system, allowing users to acquire goods and services in an economic and financial dynamic executed with ease and comfort, in addition to increasing the commercial incentive with the use of the digital currencies.

OBJECTIVES, VISION AND USABILITY

Kronobit will use the blockchain to bring General Education, literacy, basic and advanced technical training, through digital platforms through free online courses and payments with the KNB token.

Fundamentally, the Philosophy of the project is aimed at influencing the promotion of sports for youth, precisely, through a mechanism where support is provided to sports clubs and institutions with problems in their facilities. All this has the sole purpose that the practice of sports disciplines does not cease and that children and young people can also combine education and sports through online talks where essential issues such as mental hygiene and prevention are addressed. of addictions. This will be possible thanks to the alliance with the sports clubs and institutions that have been helped.

EMISSION AND QUANTITY

The Kronobit issuance was carried out through the Waves blockchain as part of its first stage, on October 14, 2020. After a long consensus by the

kronobit team, it resolved the migration to the Binance Smart Chain platform and Binance Dex in Bep20 and Bep8 token mode thanks to its security, development tools and rapid expansion in the market. This migration is carried out as of May 1, 2021

In total, **140,000,000 million Bep20 tokens** were created, within the Binance Smart Chain. These can be viewed within the **Binance Smart Chain Explorer (BscScan)** through the contract address:

(<https://bscscan.com/token/0x197dc4bfc82ad08e3fbaa930a869485236e6a792>)

Of those 140,000,000 million tokens, the members of the founding team of Kronobit have a total of Five Million KNB (**5,000,000 each**) in **Bep20 tokens**, these will remain stored in the **HOLDING** mode for a period of 1 year. The supply of said Bep20 tokens will be reduced every 6 months until reaching the figure of only one hundred million (**100,000,000**) in order to guarantee the stability of the token and the project.

On the other hand, **1,000,000 Bep8 tokens** were created within the **Binance Dex** (https://www.binance.org/en/trade/mini/KNB-9D6M_BNB), of which the founders of Kronobit own Ten and six One thousand six hundred sixty-six (**16,666**) **Bep8 tokens**, which will remain in the **HOLDING** mode for a period of 1 year. Only 900,000 tokens will be in circulation within the **Binance Dex**, these tokens will be used for the capitalization, expansion of the project and will support both investors and the Kronobit ecosystem. These tokens have an initial price of 0.0113 BNB (Binance Coin), with the possibility of continuing to increase thanks to the support of said digital asset. The supply of said Bep8 tokens will be reduced every 6 months until reaching the figure of only 400,000 as long as they have not been acquired by investors or users.

The Bep8 and Bep20 tokens consist of 8 decimal places (0.00000001) and will be divided into **Qbits** as the minimum unit and **KNB** as the maximum unit.

HOW TO BUY?

Kronobit (Bep8) is available on Binance Dex and can be purchased through BNB.

**** These tokens are exclusive for investment and sustainability of the project **** which must remain in Holding mode for a period of 1 year.

Kronobit (Bep20) is available through direct sale and exchange through project managers at the moment. It can also be acquired with any token or currency that is on the market and can be used freely for staking, farming or any type of transaction within the Kronobit ecosystem, as well as within the projects belonging to the Binance Smart Chain, such as: Swap, defi, Pools etc.

PRICE

Bep8 tokens

Its price for the first issue will be referenced in the presale value on Binance Dex and on the official website. Initially they have a value of 0.0113 BNB, but based on the investment it is estimated that the price is set by the fluctuation of the market, as well as by its support from investors and holders.

Bep20 tokens

Its price is set in relation to the previous price in the Waves Exchange platform on the day of the blockchain migration and may be acquired in the first phase through the website or through the project administrators with any currency or token available in the market. These tokens can be used for: Staking, Farming, and / or any transaction within the platform.

EXPANSION

January - May (2021)

- ❖ Launch of the Telegram Bot for staking and farming in its version 1.0 and 2.0
- ❖ Start of the new Kronobit platform
